

For the sprint 2 we implemented several features like:

- Table of the players that are representing particular country
- Pagination and drop down list in the player table
- Functional searching bar for player table
- Sorting bar that will sort the list of players alphabetically, by country, by previous achievements
- Interactive graph that shows how many medals each country has won in the Olympic 2020

Checklist Items	Status
Tests on each feature have been written and are passing	We tested each features by passing 4 test values
Tests that relate to using multiple features have been written and are passing	Completed
Cross-browser testing has been done on 4 different browsers	We tested in Safari, Chrome, Firefox and Opera
